

Re-cycling Information for End Users

The following information is applicable for eInstruction Corporation products (eInstruction, Interwrite, and GTCO Calcomp brands).

- End user Requirement is that they must have Waste of Electrical and Electronic Equipment (WEEE) disposed and treated properly in regard to the WEEE Management Regulations, 19 July 2004 and WEEE Management Decree, 6 July 2004.
- eInstruction Corporation has arranged and covered the cost for the treatment which provides for depollution, disassembly, reprocessing, recovery or preparation for disposal and any other operation carried out for the recovery or the disposal of WEEE in regards to the WEEE Management Regulations, 19 July 2004 and WEEE Management Decree, 6 July 2004.
- The end-user will deliver eInstruction Corporation's waste of electrical and electronic equipment to the following collection point for depollution, disassembly, reprocessing, recovery or preparation for disposal and will contact the following before delivery:

Sims Mirec
Hastelweg 251
5652 CV Eindhoven
The Netherlands

Planning@mirec.com

Transportation of WEEE to Treatment Operator

WEEE must be transported by a government certified logistical service or the end users will be subject to extra costs.

Sims Mirec is an approved WEEE logistical service. They may be contacted through the following:

Planning@mirec.com

+31 (0) 40 250 88 00 ask for planning

For other certified logistical service, please contact the appropriate bodies in the Dutch Government.

When WEEE is being dropped off at the Sims Mirec treatment facility, the “Delivery Announcement / Request for Collection” form, attached as page 7 of this document, must be completed in all fields marked with a “*”.

Operators of facility in which primary treatment takes place

The following Main Operator is a certified, specialized waste management company that will be fulfilling all of eInstruction Corporation’s obligations of the WEEE Management Regulations, 19 July 2004 and WEEE Management Decree, 6 July 2004, regarding disposal and treatment.

Sims Mirec engages in a wide range of activities relating to the recycling of electrical and electronic products. It is experienced in the collection and processing of both household goods and appliances (brown and white goods) and professional and industrial equipment.

The Sims process is a balance between disassembly and mechanical separation of complex materials, resulting in a minimisation of the labour intensive manual disassembly.
